PULP MOULD

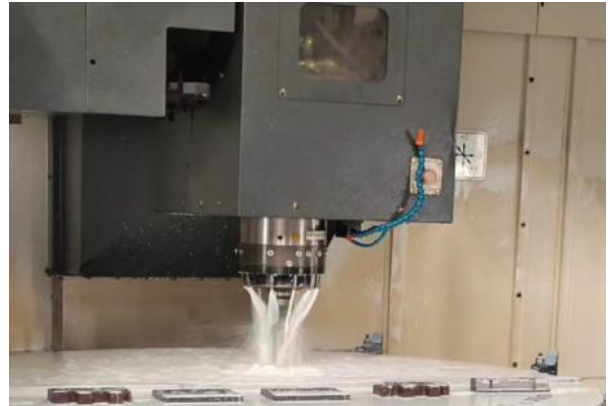

Founded in 2020 and based in Rajkot, Gujarat **Aashutosh Mould** is your **One Stop Solution** for all your **compostable** and **eco-friendly disposable product** needs. From coffee cups and lids, to cold cups, plates, bowls, takeout containers and cutlery, we offer the right environmentally friendly solution every time.

Our mission is to offer innovative products and solutions that have a positive impact on our customers and their environment.

- Molds are developed in-house under the supervision of highly educated engineers.
- Molds are manufactured from aluminum alloy aircraft grade.
- Solution for Prototype tooling design.
- We assure the quality of the mold.
- Our team will inspect the mold after the development.
- We will check the expediency of the mold. It has to perform & form accurate products.

Sugarcane bagasse tableware mould is used to make disposable tableware products ,and we make the full lines of pulp tableware moulds ,like bowls , plates , cups, food trays and box ,clamshells and so on, we are well experienced in sugarcane pulp mould making , for both semi-automatic machine and automatic machines.

Driven by excellence, we believe in building long-term relationships with all our customers. As an industry leader with tremendous experience and expertise in global sourcing, we offer many advantages such as:

- Excellent Product Quality
- On Time Delivery
- Competitive Pricing
- Prompt Response
- Strong Engineering Capabilities
- Customer Satisfaction

CNC - VMC machining | Designing | Quality control
Reverse engineering |Assembling |Technical support

Sustainable Features

Molded Pulp is a sustainable product with biodegradable properties.

The Best Quality

Because it uses fresh raw materials produced by own pulp mill, so the quality and strength are excellent.

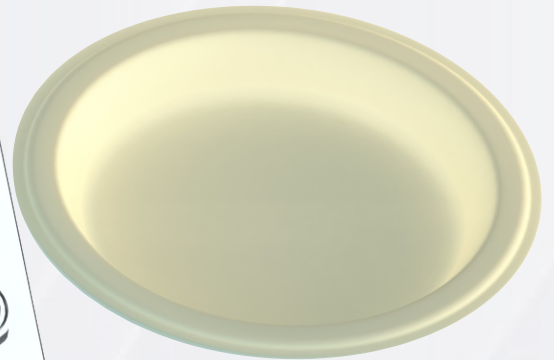

Free-form Design

Molded Pulp can be shaped into any kind of forms according to consumer needs.
